

NEW & Included

Order Job Feature and Design Library

Coordinate with sales and production teams using the new Order Job Feature and integrated Design Library, included in **both Lettering and Editing**. Fully compatible with EmbroideryStudio e4 Designing and Decorating.

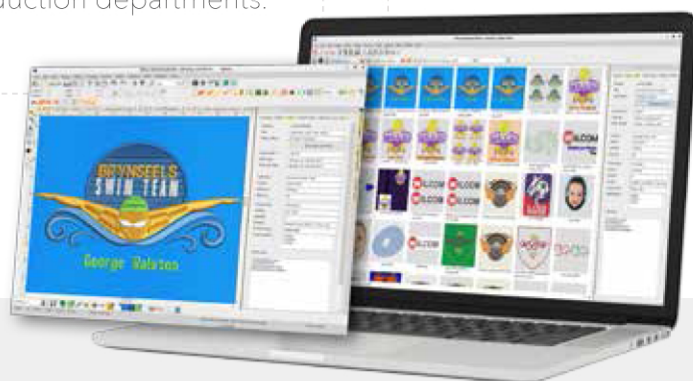

Order Job Feature

- Save customer, order & job details in the .EMB design file. A separate database is not required
- Print new .PDF approval sheets with job details or email directly to customers for approval
- Create digitizing requests as .EMB designs and manage status in the Design Library
- Electronically send .EMB files with job details directly to production departments.

Integrated Design Library

- Quickly see recent designs by date, no matter what folder they are in
- Search designs in seconds by customer, order, date or any text field
- Group and sort designs by customer, order, date, folder, design status, stitches and more
- Browse designs from all folders in one screen, or folder by folder.

EMBROIDERY STUDIO e4
Lettering

Creative by nature.
Efficient by design.

WILCOM®

W7265

EmbroideryStudio e4 Lettering is powerful automatic lettering, customizing and machine connection software for non-digitizing staff in a retail embroidery shop or production facility.

With full professional control of all lettering and stitch settings, over 200 digitized embroidery fonts and automatic stitching of TrueType and OpenType fonts, create professional quality naming and lettering designs quickly and easily without a digitizer.

Combine lettering with resizable logos or stock designs. Automate repetitive jobs with the Team Names feature and automatically send stitch files to the embroidery machine.

Key features

NEW AND IMPROVED LETTERING

- 25 NEW embroidery fonts including 3D foam, logo fonts and specialty fonts
- NEW predefined "Lettering Art" envelope shapes
- Easier selection of embroidery fonts by style or type
- Expanded capabilities and easier to use Team Names feature
- Improved quality of automatic TrueType / OpenType stitching.

EASIER STANDARD TEAM NAMES

- Create and manage individual's names by team
- Import/Export team members via .txt or .csv files
- Create single baseline designs with all team names in one .EMB file
- Export team names for stitching individually or in batches
- Create a matrix layout of multiple team names in large frames.

ENHANCED MONOGRAMMING

- Personalize predefined monogram designs or create your own
- Extensive but easy to use monogramming user interface
- Separate tabs for Designs, Letters, Ornaments and Borders
- Advanced stitching parameters hidden unless asked for
- Use embroidery fonts or TrueType fonts.

MORE EFFICIENT DESIGN WORKSPACE

- 4K monitor support, large or small icons, optional labels
- Switch between multiple open designs effortlessly with new design tabs
- New Stitch Player to visualize stitching sequence with classic media player controls
- New Color toolbar commands and My Threads docker for easier color management.

SELECT AND EDIT PARTS OF DESIGNS

- Group/Ungroup designs to edit individual design objects
- Change object properties for selected objects eg, color, density, pull, underlay and more
- Reshape individual design objects and lettering
- Cut/Copy/Paste parts of designs.

ADVANCED DESIGN PROCESSING

- Resequence designs by object, color or selected sequence
- Manipulate design objects in the Color Object List docker
- Check individual stitches in the Stitch List docker
- Automatically process densities by percentage for selected objects or stitch types.

EmbroideryStudio e4 Editing combines all of the features of ES Lettering with advanced embroidery editing capabilities. This provides powerful software for non-digitizing staff in a custom embroidery shop or production facility.

Full editing control over .EMB object properties allows for recoloring, reshaping, and resequencing of all design objects. Change densities and other settings to suit different fabrics or sizes.

With over 200 professionally digitized embroidery fonts and direct machine connections, you can create and stitch new variations of existing designs quickly and efficiently.

Correct small technical mistakes or incorporate simple customer changes without sending it back to your digitizer, saving time and increasing your embroidery expertise.
