

STITCH & SEW 2 Level Differences

EDITOR PLUS contains:

- **Lettering** – 72 fonts in fill and satin stitching
- **Full stitch settings** (like underlay, density/ stitch angle, etc)
- **Editing** – lets edit stitch settings of anything you create (lettering)
 - o Edit stitching of existing designs – can take out parts of design for separate use for example.
 - o Can combine text with existing full digitized designs
 - o Ability to open, edit, and re-output to/from commercial embroidery format designs

STUDIO contains:

- **Additional Lettering Features:**
 - o Add Truetype font importation (use your computer fonts)
 - o Auto-satin (or running stitch) border setting for lettering
- **All of Editing Features from Editor Plus Level**
- **Digitizing Features**
 - o Auto Digitizing Suite
 - Magic Wand for fast, (semi) automatic digitizing
 - AutoPunch to automatically digitize full designs in a few clicks
 - o Full manual digitizing tools for true digitizing:
 - Freeform tool for fills, complex fills, running stitches, satin borders
 - Column tool: point-counterpoint digitizing (for satin & fill columns)
 - o Extensive complement of stitch types
 - Basic fills/complex fills, satins, turning satin fills, running stitches
 - Special stitch types include gradient fills, motif fills (with motif library)
 - PhotoStitch – very functional, instant embroidered portraits from photographs
 - o Fully adjustable stitch settings to control sewing quality across different kinds of fabrics
 - 3 types of underlay with adjustable settings
 - Adjustable stretch (pull compensation)
 - Library of “recipes” of stitch settings for different fabrics, space for custom recipes

STUDIO PLUS contains all of the features from the above 2 programs plus:

- **Additional Lettering features**
 - o More fonts (100 vs 72)
 - o Name Drop feature in lettering makes team names a lot faster
 - o Has more lettering frames for shaping text (30 vs. 9)
- **Additional Digitizing Features**
 - o Additional shortcuts that makes digitizing faster
 - o More stitch types (more motifs) for fills
 - o Machine code level editing of any stitch file
